PROFESSIONAL SUMMARY

Blockchain and Full Stack Developer with experience building decentralized applications using Solidity, Ethereum, React, Rust, PostgreSQL, and AI technologies. Developed multiple real-world projects involving smart contracts, blockchain reward systems, wallet authentication, and AI integrations. Passionate about solving practical problems through scalable software and seeking opportunities in software engineering, blockchain development, and Web3.

EXPERIENCE

Blockchain Development Intern

Feb 2026 – Present

Stellar (Virtual)

- Built blockchain-powered reward mechanisms using the Stellar ecosystem.
- Worked on AI-integrated financial applications utilizing blockchain incentives.
- Collaborated on backend logic and blockchain transaction workflows.

Blockchain Development Intern

Jul 2025

Code Alpha

Pune

- Developed Solidity smart contracts for decentralized applications.
- Integrated MetaMask wallet authentication into Web3 applications.
- Improved understanding of Ethereum architecture and smart contract deployment.

Blockchain Development Intern

Apr 2025 – Aug 2025

Future Intern

Virtual

- Developed blockchain-based projects focused on Ethereum and Solidity.
- Implemented secure smart contract functionality following best practices.
- Participated in project planning, testing, debugging, and deployment.

PROJECTS

BuildVerse | React, Rust, PostgreSQL, Ethereum

- Developed a gamified Web3 builder platform integrating blockchain, reputation systems, and community interaction.
- Implemented wallet authentication, bounty management, user profiles, and decentralized reward mechanisms.
- Designed scalable backend APIs using Rust with PostgreSQL database integration.

FinWise AI | React, AI, Stellar

- Developed an AI-powered financial advisory platform with blockchain-based reward mechanisms.
- Integrated AI-driven budgeting, savings recommendations, and financial planning features.
- Implemented on-chain reward tracking using Stellar blockchain.

CodeCraft | React, Solidity, Ethereum

- Built a gamified decentralized learning platform for programming education.

- Implemented ERC-20 token rewards and NFT certificates for learner achievements.
- Designed smart contracts enabling transparent progress tracking and rewards.

Shadow AI | React, Node.js,

- Developed an AI-powered security assistant to prevent accidental exposure of sensitive data in public AI tools.
- Implemented detection of API keys, credentials, personally identifiable information (PII), and confidential business data before submission.

PlantCare | React,Python, Gemini AI

- Built an AI-powered plant care assistant that provides personalized guidance throughout a plant's lifecycle.
- Integrated Google Gemini AI to generate customized recommendations based on plant species, environmental conditions, and user inputs.
- Implemented visual care guides and intelligent reminders to help users monitor watering, nutrition, and overall plant health.

EDUCATION

Savitribai Phule Pune University

2024 – 2028

Bachelor of Science in Blockchain

Pune

- **Relevant Coursework:** Data Structures, Algorithms, DBMS, Computer Networks, Operating Systems, Blockchain Technology

TECHNICAL SKILLS

Languages: JavaScript, Solidity, Python

Frontend: React, HTML, CSS, Tailwind CSS

Backend: Node.js, Express

Blockchain: Ethereum, Solidity, Hardhat, Stellar, Ethers.js

Databases: PostgreSQL, MongoDB

Tools: Git, GitHub, VS Code, MetaMask

ACHIEVEMENTS

Project Highlights

- Built multiple full-stack applications integrating AI and blockchain technologies.
- Developed decentralized applications using Ethereum and Stellar ecosystems.
- Designed secure smart contracts for blockchain-based reward systems.
- Completed three blockchain-focused internships involving Web3 development and smart contracts.

CERTIFICATIONS

Completed certification in AI ML from samsung innovation campus
